

createchange

It's time to change the way we do business. It's time to change the way we impact the environment. It's time to change our approach – to work together to develop solutions, products and tools that make a difference.

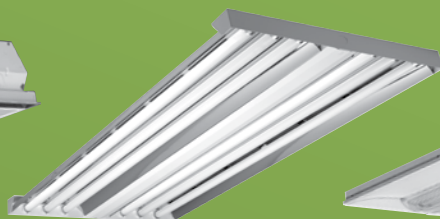

Why? Because the case for change is too compelling. Change means lower energy bills. Change means lower costs over the life of the products. Change means utility rebates. Change means credibility with our customers and with specifiers.

EnergyMax

TUNED

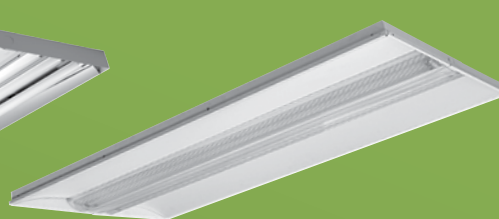

The ENERGYMAX™ tuned system produces an amazing 89% efficient luminaire that provides the same lumens as a traditional three-lamp parabolic while using only two lamps. With EnergyMax, you save without sacrificing light levels.

VersaBay

COOL

Concerned about ballast temperatures in unconditioned spaces? Worry no more. With Advanced Thermal Management – our innovative heat dissipation system – VersaBay™ features a 5-year warranty at 65°C while reducing energy costs up to 50%.

ZPT

CONTROL

Room-filling light with aesthetic flair. Our ZPT™ luminaire provides the right amount of light on the work surface, reduces harsh shadows, and evenly illuminates the walls – while reducing power consumption and lowering costs.

Along with these energy-efficient products, Columbia Lighting now offers resources including an informative brochure on EAct, the Payback Machine Calculator, and other tools to help you get up to speed.

It's easy. Join us at create-change.com.
