

# LESS ENERGY WITHOUT SACRIFICING LIGHT

## EnergyMax® Parabolic

### TUNED

The EnergyMax® Parabolic luminaire is a system of tuned components designed to provide the perfect balance between light output and energy conservation. A true parabolic, the EnergyMax® Parabolic luminaire fills the energy-savings void in the still popular parabolic market.

## e•poc® Luminaire

### SLEEK

A new epoch has dawned in indoor lighting, characterized by clean lines, full light distribution, low contrast luminance, and heightened attention to energy reduction and sustainability. The e•poc® Full Distribution Luminaire embodies these qualities in a 2-lamp lensed package.

## VersaBay® High Bay

### COOL

VersaBay® luminaires are the new industry standard for fluorescent high bay lighting with Advanced Thermal Management, serviceability, and performance that is unrivaled in the marketplace. VersaBay® UL listed high bays carry an unequaled ballast warranty of 5 years at 65°C for T5HO and 55°C for T8.

Columbia Lighting's energy solutions are designed to reduce carbon emissions and mercury toxicity in the environment. And just as important, createchange® energy solutions immediately reduce your overhead.

Let us help you reduce energy consumption, lower your maintenance costs, and move one step closer to a sustainable future.
