

**From the company that introduced
the 3-lamp parabolic...
...the product that will obsolete it.**

Columbia Lighting EnergyMax™ Parabolic

The EnergyMax luminaire provides the same light as a 3-lamp parabolic **using 22% less energy** with 2 standard 80 CRI T8 lamps. The breakthrough fusion of **MIRO® louver, precision-tuned ballast from ULT**, and optical design delivers the right light for the least energy.

Only with MIRO is this 2-lamp energy-saving design possible.

Begin each project with **MIRO** by ALANOD®, the world leader in reflective surfaces. ALANOD offers a complete line of **MIRO**, so designers can create just the right optics for every lighting situation. Assure yourself success right from the start with **MIRO**.
