COLUMBIA LIGHTING ENERGY SOLUTIONS

morph™ FLUORESCENT EXTERIOR AREA LIGHTS

T5HO luminaires with unprecedented energy savings and light control.

Years ago, fluorescent lighting dominated the outdoor landscape. With the advent of HID and its advantages, particularly in regards to ambient temperatures, it supplanted fluorescent. Today, we have come full circle with area lighting returning to its fluorescent roots. The evolution of electronic T5HO and advanced reflector technologies is creating a metamorphosis in fluorescent performance offering unprecedented energy savings and lighting control.

Columbia Lighting is a proud manufacturer of ARRA qualified lighting.
