COLUMBIA LIGHTING ENERGY SOLUTIONS

# morph™ FLUORESCENT EXTERIOR AREA LIGHTS

## *T5HO luminaires with unprecedented energy savings and light control.*

Years ago, fluorescent lighting dominated the outdoor landscape. With the advent of HID and its advantages, particularly in regards to ambient temperatures, it supplanted fluorescent. Today, we have come full circle with area lighting returning to its fluorescent roots. The evolution of electronic T5HO, matched with advanced reflector and amalgam lamp technologies, is creating a metamorphosis in fluorescent performance offering unprecedented energy savings and lighting control over a broad range of ambient temperatures.

Columbia Lighting is a proud manufacturer of ARRA qualified lighting.
