

FEATURES

- Ideal for manufacturing areas, retail stores, and gymnasiums
- Horizontal or vertical lamp position
- Choice of tempered glass or acrylic lens with tempered glass overlay
- Ballast accessible from below
- Ballast housing is made of aluminum for maximum heat dissipation
- White powder coat finish, painted after fabrication
- Uses EISA compliant pulse start metal halide technology
- Louvered version also available, see HH22 Parabolic

PROJECT INFORMATION

Project Name _____

Type _____

Catalog No. _____

Date _____

CONSTRUCTION

Housing constructed of code gauge steel. Power door is constructed of 18 gauge steel and is secured with (2) ¼ turn fasteners. The power door contains all of the electrical components and can easily be removed from the fixture for maintenance. The ballast housing is constructed of aluminum for maximum heat dissipation. The housing is riveted together for maximum rigidity. Standard door frame is constructed of cold rolled steel and is retained in fixture with two sturdy cam latches and T-hinges. The door can be installed from either side. Consult your Columbia representative for availability of aluminum doors.

INSTALLATION

A ⅝" knockout is provided in the capacitor housing. All leads are pulled through the knockout for installation.

ELECTRICAL

Wired with core and coil ballasts and are SCWA.

CEILING COMPATIBILITY

Luminaire is available to fit most standard ceiling types as shown at left. For information on compatibility with specific ceilings, contact your Columbia representative. All luminaires are provided as standard with integral T-Bar clips.

FINISH

Housing and all other parts are painted after fabrication with a white polyester finish for maximum reflectance longevity.

CERTIFICATION

All luminaires are built to UL 1598 standards and bear appropriate UL and cUL or CSA labels. Damp location labeling is standard.

AIR HANDLING

All units are static and cannot be used for supply or air return.

DIMENSIONAL DATA

CEILING COMPATIBILITY

For lay-in installation in exposed grid ceilings. Maximum tee widths of 1" and maximum tee heights of 2" allowed.

For tile, plaster or plasterboard type ceilings. Overlapping extruded aluminum trim conceals edges of ceiling opening. Wing hanger suspension system included. For row mounting, row information is required.

NOTE: All dimensions are in inches; dimensions and specifications are subject to change without notice. Please consult factory or check sample for verification.
