**Statement Covering Special Warranty for ULT LED modules  
in Hubbell EPC-LED Fixtures**

---

The LED modules provided by Universal Lighting Technologies (ULT) in the Hubbell EPC-LED fixtures are warranted for a period of five (5) years from the date of module manufacture to be free from failure due to the following conditions:

1. Catastrophic component failure, under normal and proper storage, installation, maintenance and use of the Hubbell EPC-LED fixture. Catastrophic component failure means non-illumination of a total of 10% or more of the individual light emitting diodes or more than one (1) linear inch in the module, or lumen loss greater than 20%. ULT reserves the right to deny a warranty claim if there is evidence of open wire bonds from mechanical damage and will inspect received units using Optical Imaging, X-Ray, Electrical and any other equipment as necessary. If open wire bonds are found from mechanical damage, in ULT's opinion, the claim will be denied and units returned as is or scrapped at the end users discretion. ULT will make the sole determination of cause of failure. All other terms and conditions of ULT's LED Warranty Document apply.
2. Chromatic deviation in excess of 3 Macadam Ellipses defined as a change of no more than three (3) Macadam Ellipses from the nominal color point of the population measured at the install site.
